Abstract

The Integrated collaborative treatment program will aim to improve the understanding of how the forces of natural therapeutics may influence aggressive and anti-social and/or self-destructive behavior within high security prison community and outreach communities environment. Science has not yet developed a sound diagnostic base for conduct disorders and the treatment of violence. CMS will lead program evaluation research design and delivery of the program and benefit of ICTP process as an intervention for conduct disorders from pre-clinical assessment to treatment.

Objectives of the project: The initial criteria of the objective includes evaluation of the provision of a naturopathy based integrated rolling programme as a referral path for high security prisoners in collaboration with Department of Justice within the community. The program will include high support integrated outreach program and staff training/occupational option. Report research will evaluate impact on pain suffering and control. Health research resources for prisoners and staff are disproportionately low in relation to general health expenditure.

Expected deliverables at completion of this research:

1. The achievement of the ICTp model of integrated health, from pre-clinical assessment to outreach treatment.
2. A skilled central management ICTp training education license module for conventional medical/ natural medicine healthcare professionals with the collaboration of global natural medicine umbrella institutes.

Background of the proposal: The independent research and evaluation report in mulligan manuals; structural alignment integrated treatment program regime in cranial cerebro spinal forces integrated natural medicine regime in the treatment of violence is within UK prisons.

It is only by conforming to Natural Medical Law of cure a practitioner can work safely in this field of nature cure medicine [2,3]. We train and provide multi-disciplinary teams and experts in countries that collaborate in research. We have a ground breaking UK government funded research report in the treatment of violence regime within high security prison regimes. My purpose in writing this article outline is to place before my traditional and conventional medicine colleagues and health care students who are interested in this knowledge which will enlighten a little in the little under-stood 'law of natural medicine similars'. It is unavoidable that I include technical details and touch in on the deeper studies which is necessary to the forensic naturopath consultant.

Time Matters

Understanding of Natural Medicine Law is evolving. 'Divine thought wherein lies concealed the plan of every future' 1888 [4]. We share forensic naturopathy vision in the treatment of violence, suicide prevention and homicide prevention. We outline fundamental understanding relative to force and motion of key biological concept in the timing of events and reflection impact. We bring your attention into future naturopathy expertise in the treatment of disease. How do we reach the source of individual and family cultural injuries injustice, tragedies, and starvation, plagues that have occurred in long forgotten time, impacting here and now in present time? Let us consider the possibility of permeating time returning to your birth. We need a medicine that can reach back in time and forward to a healthy well force in the future. How can we reach through time, not just in thought? Supposing the injury is held as a reflection at atomic cell memory level? Yes, it's definitely there. As a blueprint for continuity? How can we reach through time to influence the living structure that governs function holding the fault? To influence the past is it possible to change the future in present time? Does an engineering process exist in the organic biological skeletal? Where? Violence is a toxic intrusion on the structure that governs function. A ghost irritant entering the body by force impact. A change appears in the brain from the effect of impact. The consequence is a dissonance echo like a continuous scream which escalates through time and is held as a fracture blueprint in cellular memory. Toxic intrusion impact causes intrusion obstruction of motion symmetry rhythm. We now have a sound fault in the engineering mechanics you cannot hear which manifests heat motion and symmetry fault. We now also

have an alien heat inflammation lesion pattern you cannot see hear, touch, harming the natural rhythm. How can you repair a lesion pattern you cannot observe and do not believe or know exists. Surely, you would measure this as an issue that does not exist and in fact an impossibility to influence [5].

Forensic naturopathy UK government funded research report

We have achieved a level of public interest in a new approach to patient mental health care. Public acceptance requires measured attention and results. Adults and children are caught up in lashing out violent behavior with toxic chemical solutions. As money is the global matter and not the mater matters. What we ask are the costs? Statistics; partner violence causes more death than wars and homicide. The cost of violence against women is estimated at 2% of the global gross domestic product. This is the equivalent of 1.5 trillion approximately the size of the economy in Canada. In United States partner violence annual costs estimated at \$5.8billion. In Canada violence against women and children costs estimated at \$11.38 billion. In England and Wales we are looking at a cost of \$32.9 billion. In the next article I will outline the investment of wealthy countries in addressing the cause. One really rich leafy EU country have 6 beds in a public backward with a five year waiting list.

Opening a portal into another dimension

There is a lack of understanding in nature's 'law of similars'. The Irish Institute of Naturopathic medicine in collaboration with natural medicine institutes, associations, universities Government research has developed a program to mitigate the impact of violence globally for mothers and women and families. Can we prevent violence from occurring? Current thinking is to control violence chemically or/and with force. Transmutation through collaboration in the law of cause and effect? How? The current understanding is that violence cannot be prevented. We do not agree.

Amundsen setting off to his arctic exploratory adventure mission packed but two shovels.

Violence as a solution to solving differences

The young man I seen today in prison was stabbed. His partner was punched in the jaw and reeled backwards with the force of the punch. The next time he seen the man who attacked her he was ready for him with a knife in his pocket and a sword on his belt. It took the strength of twenty men to arrest him. We reach marginalised cultures youths impacted by knife violence in the streets, in the workplace, in communities. We reach EU cultures with highest rates of suicide and homicide. Children roaming the streets with zero parental attention. Fathers in a toxic rage battering the mother. One mother was battered so badly in front of the children who would hide and ring us, we would send the Garda and ambulance, and the first responders had to resuscitate her.

Cranial mechanics engineering

Recovery from histories of lashing out and self-harm. War with roots in toxic desperation for fool's gold and power at any cost. Who agrees to atrocities? Why? What are the consequence? Light wave patterns are scattered from the skeletal mechanism. A laser beam is directed at the object, light is reflected. Post impact the mechanism changes its properties based on the intensity it receives. The recording is processed to measure the pattern. A crack appears and vanishes, immunity is compromised. When a luminous force is processed to record the motion of the pattern. You can observe the reflection at a local level in particles influencing in the form of a traumatic echo travelling through time. Reconstruction recreates the motion of the structural

mechanics, motion, and rhythm. The valuable application is for scientific visualization of distortion underlying trans-ference of sound through time.

War: Violence against one person in one country can mean war against all in another. There is non-negotiable sound relativity. We exist as one. The impact effects leave no individual in the community's life without pain and suffering. Massacres inflames hatred and motivates foolish reactive revenge. Violations leads to further violence and conflicts out of control as the impacted sees it as a duty of care to activate full force reaction.

Victory to the darkness influenced into violence. The shadow dance. Keeping marginalised homeless uneducated malnourished. In the Irish famine cruelties were practiced against the starving by men who were themselves well fed. Emotional intelligence damage.

Gravitational structural motion stability - adjustment of skeletal structure engineering: There are distortion implications in the family constellation echo in linear time. Violence against women and mothers is a barrier to equality and global development of science and medicine.

Global failure in environmental care management: Marginalised, despised, impoverished people are kept in homelessness, suffering, mentally sick, institutionalized with zero access to well-being care and the prison black hole. Disturbed youths influenced into hatred in drug dealing gangs for acceptance reflecting in time dysfunctional family echo.

Skull morphology and neurological implications

What is it that is ever coming and going? 'The great breath'

What is it that ever was? 'The germ in the root'

Nature is a perpetual circulatory worker, generating fluids out of solids, fixed things out of volatile. Prisoners struggle to access both urgent and routine mental health care with literacy issues, disabilities, paranoia and mental health care failure. Government research planning into the future.

Naturopathy law of cure: Communities that collaborate are entitled, greed tramples on 'Natural Medicine Law' and rejects humanity compassion mercy and justice. The force of good is withdrawn and desolation follows.

Natural medical law in the treatment of violence: Is more violence the solution to the problem of violence? Lethal toxic dirtier missiles. What about the problem of illegal drugs? Is more drugs the answer? An authoritative force? A strong man? Fear threat? You will do what I say or else. Control management motivated by fear. Toxic institutionalization destroys life-force creativity.

Doing Time: Physics states due to the time light takes to travel we can look at the sky and see into light emitting from a star that has deceased. We can view starlight from dying stars that does not exist here and now.

We can see past light influencing here and now that does not currently exist. This visual delusion is accepted as normality relativity in context of perception.

Dark matters: We need to address the fundamental nature of primitive toxic masculinity towards family constellation creativity. Children need fathers. I listened to a distraught suicidal man crying in prison today. He was previously a champion in his youth for his physical strength in a now Olympic sport. He was under seven man unlock initially in prison. He cannot read or write he tore up the book of evidence. 'I left school aged seven years.' I do not understand big words'. From another EU country his ex-wife contacted me completely independently with concerns as to his son who is a suicide risk to himself. Coincidence?

Global collaborative prison gravitational force without a pathway is a supermassive black hole for collapsed toxic masculinity. It took the force of twenty police to control this one mentally distressed

disturbed man. He is on two man handcuff in court and four man cell unlock on the landing. So how do we access time at a cellular level, law of cure states that even if no one ever finds out what we did, the fact we did it means it has a consequence. An inviolable reflection on the encoded vibration recorded plane including biological (Akashic records) into the inherent fabric of cellular biological space a compendium of universal events thoughts words emotions and intent ever to have occurred in the past present future in terms of all life forms not just human in respect of action that that has occurred that needs untangling or healing exists. Activating the frequency which holds this force requires person centred training in which the practitioner cooperates with universal law, family constellation trauma through the generations, releasing debt opens portal to grace. Non-negotiable law of cure a child crushed in childhood the damage persists as it must. This program identifies fear phobias and blocks held from childhood and family constellation.

Are some mental illnesses untreatable?

“There’s no cure for mental illness, but there are lots of effective treatments. People with mental illnesses can recover and live long and healthy lives.

This is petrified current thinking on mental illness. We say it is of course not valid this is conventional medical attention at this point in observation.
