

We would like to express our sincere gratitude to the reviewers who generously gave their time and expertise to provide constructive feedback on the earlier version of our manuscript. Their feedback was tremendously helpful in improving the quality of our work. We have addressed each of their specific comments and suggestions in the revised manuscript.

Responses to the Reviewer's Suggestions

Suggestions: Since this paper is a critical review of literature, it is expected to have information on the databases, key words, selection criteria, and the period covered by the literature search.

Response: We deeply appreciate the reviewer's very positive feedback on our manuscript and have made the necessary revisions to ensure that our manuscript meets the expected format. More specifically, we developed a new section, "Selection Methods," to present the requested information. Please refer to the second and third pages of the revised manuscript to locate the newly developed section to address the reviewer's concerns and suggestions.
