

Not required but wish the introduction was more attention grabbing to draw the audience in.

Needs more context on this argument. They need to be developed more. As it will help support the need for more specific research.

You used “40” in the abstract, keep it consistent.

age of “students” should be mentioned or a more descriptive word for the population as students is too broad without previous notion.

You used “Black” earlier and now African American, it needs to be notated if you want to identify the individuals interchangeably.

spelling revision needed

Recommendation to explain how AA experiences may differ and biases can still occur even if individuals have the same racial makeup.
