

Reviewers Comments Response: **Perceived Parenting Styles and College Student's Psychosocial Adjustment**

1. I have provided 5-8 key words in line with author's guidelines and reviewer's suggestion. These key words did not include repetition used in the title as suggested by the reviewer.
2. I have thoroughly read the entire text and corrected the punctuation and grammar errors as suggested by the reviewer. I went ahead and accepted a couple of the reviewer's suggestions as well.
3. I clarified the research problem in the abstract section and I also described my reason for using the statistical technique of canonical correlational analysis.
