

As a child welfare professional myself, I found this manuscript very important and relevant to the field.

I would consider a different article title such as:

-Examining the Role of Trial Home Visits in Predicting Foster Care Re-Entry

-Trial Home Visits and Their Impact on Foster Care Re-Entry Rates in the United States

Please check the manuscript for misspellings and grammar issues that I noticed throughout. Might need further editing.

In the introduction section, please provide explanations of title IV-E funding for those readers who are not aware Method section is well-done but could use some editing to simplify the methods used.

Appendix section is somewhat confusing. What is the purpose of it?
