**Subject: Manuscript Submission – Evaluating the Effectiveness of Behavioral Threat Assessment Programs in Preventing School-based Active Shooter Incidents (JMHSB-257)**

Dear Editor,

I am pleased to submit the revised and fully updated version of my single-author manuscript entitled "Evaluating the Effectiveness of Behavioral Threat Assessment Programs in Preventing School-based Active Shooter Incidents" for consideration in the Journal of Mental Health and School Behavior (JMHSB).

This comprehensive review synthesizes contemporary research, policy guidance, and state-level exemplars concerning Behavioral Threat Assessment (BTA) programs in K–12 educational settings. The manuscript evaluates the evidence base underpinning such models, including the Comprehensive School Threat Assessment Guidelines (CSTAG). It integrates findings from recognized frameworks, including Colorado's Safe2Tell initiative, the California Department of Education's threat assessment protocols, and Wisconsin's School Threat Assessment and Management Protocol (WSTAMP).

All reviewer feedback has been fully addressed in this resubmission.

Revisions include:

- Explicit sourcing of all state and district examples through authoritative citations (e.g., Colorado School Safety Resource Center [2021]; California Department of Education [2025]; Wisconsin Department of Justice [2025]).
- A refined Abstract with Keywords, a clarified Introduction roadmap, and streamlined section transitions for narrative consistency.
- A comprehensive, APA 7th Edition–compliant reference list reflecting both empirical and policy sources.

This manuscript contributes substantively to the growing literature on school-based threat assessment and violence prevention by bridging behavioral science, educational leadership, and public safety disciplines. It has not been published elsewhere and is not under review by any other journal.

Thank you for your time and consideration of this submission. I appreciate the reviewers' constructive insights, which have strengthened both the rigor and applicability of this final version. Please contact me with any questions or requests for further materials.

Sincerely,
